August 19, 2025 – Turner Construction Company has been selected to build a landmark 46-story commercial office tower at [343 Madison Avenue](#) in Midtown Manhattan. Developed by [BXP](#) and designed by [Kohn Pedersen Fox \(KPF\)](#), the project will include an underground transit entrance serving **Grand Central Terminal**, further enhancing connectivity in one of New York City’s busiest transit hubs.

The 930,000 square-foot tower has been meticulously designed to minimize its impact on light and air in the densely developed area. The structure will feature strategic setbacks to create visual engagement and incorporate green spaces, reinforcing its connection to the surrounding urban environment. Reflecting a commitment to sustainability, the project is targeting LEED Platinum certification from the U.S. Green Building Council.

“We are honored to contribute to a project that not only enhances the iconic New York City skyline but also improves access to public transit,” said [Luigi Morfea](#), Construction Executive, Turner Construction Company. “Our top priority is ensuring the safety of the public and our workforce throughout the construction process. We look forward to collaborating with BXP, KPF, and our trade partners to bring this vision to life.”

###

## **About Turner Construction Company**

Our vision is to be the highest value provider of construction services. We deliver our services on complex and challenging building projects of all types and sizes throughout North America and in 30 countries around the world. We seek to create a healthy, prosperous, and sustainable future for our people, clients, partners, and the planet. We have earned a reputation for integrity, working safely, and driving innovation. With a focus on creating an environment where people can be at their best, be authentic, and be treated with respect and dignity, the company is widely recognized as a great place to work. The firm is a subsidiary of HOCHTIEF, an engineering-led global infrastructure solutions provider with leading positions in North America, Australia and Europe and a rapidly expanding presence in high-tech, energy transition and sustainable infrastructure markets.
